

Objective

- To provide consistently higher current income than investment grade products.
- Risk adjusted returns to exceed that of traditional products over a rolling three year period.
- Our primary goal is to goal is to outperform the ICE BofAML 1-5 Year BB US Cash Pay High Yield Constrained Index, attained with lower volatility than the index.

Strategy

We seek total rate of return through the active management of credit risk. Other factors that may affect performance include analysis of industries, call risk and structure risk. Under normal market conditions at least 70% of the strategy will be invested in corporate bonds. The majority of the corporate bonds will be rated BB and B in most market environments. Other sectors that are strategically utilized to attain diversification include municipal bonds, MBS, CMBS, ABS and government bonds.

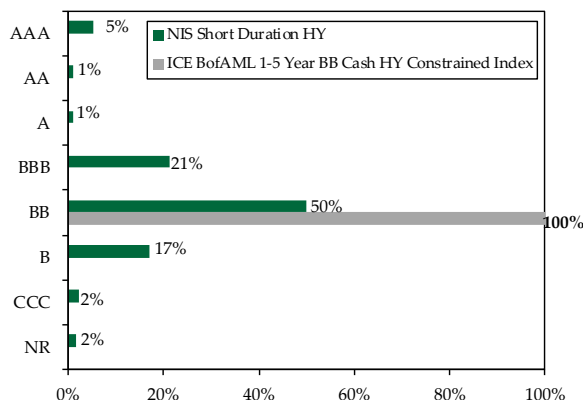

Philosophy

The focused emphasis is to maximize yield on a risk adjusted basis. We seek to add value primarily by security selection and sector rotation. We believe it is possible to consistently improve the overall yield or risk profile of the strategy through a careful analysis of short term changes in markets. Longer term, performance will rely on the ongoing credit analysis of individual securities.
