

Overview

- Objective: To provide returns well in excess of conventional fixed income investments with lower volatility than equities
- Active long/short trading strategy investing primarily in \$25/par board listed & \$1000/par preferred and hybrid securities
- Attempts to take advantage of an inefficient market via a close monitoring of the marketplace and searching for relative value
- Primary sources of return: dividend income and short term trading profits
- Does not use leverage

Risk Management

- Investable Universe primarily includes:
 - **Long positions:** preferred stocks, preferred-like securities, debt securities
 - **Short positions:** preferred stocks, preferred ETFs, debt securities
- The strategy intends to maintain at least **60% of its portfolio in investment grade securities**
- No more than **10% of total assets will be invested in securities of a single issuer**
- Diversification is achieved by typically **maintaining over 150 positions**
- The strategy maintains the **ability to short** and typically has a portion of the portfolio that is short
 - Can **take advantage of pricing inefficiencies** and **provide downside protection** during severe selloffs
 - Short position typically ranges from 5% to 15%
- Dual modes of trading improves liquidity. Can **raise cash quickly** in a defensive manner
